

KUSHALL JAIN

Full Stack Mobile Engineer — Flutter • Python (Django) • Firebase • RESTful APIs

kushall.jain07@gmail.com | 9990079764 | linkedin.com/in/kushall-jain-263009261 | github.com/kushallj | kushall.in

Summary

Full Stack Engineer with 4+ years of experience across mobile and web development, including hands-on Flutter development at Progfin — building user-facing screens, authentication/security features, backend API integration, and Firebase-based push notifications within a production financial app. Strong backend foundation in Python (Django REST Framework, FastAPI) and RESTful API design, with production experience across PostgreSQL and Firebase for data storage and real-time features. Comfortable owning features end-to-end from UI implementation through backend integration and deployment, with CI/CD experience (GitHub Actions) and a track record of code reviews and mentoring junior engineers in a regulated fintech environment processing 150+ Cr in monthly transactions at 99.5% uptime.

Technical Skills

Mobile: Flutter (UI screens, auth/security features, API integration, Firebase push notifications), Dart, Cross-Platform Development

Backend: Python, Django REST Framework, FastAPI, Node.js (Express), RESTful API Design, Microservices, JWT/Token Auth

Cloud & Backend-as-a-Service: Firebase (Auth, Notifications), AWS (Lambda, S3, ECS, IAM, CloudWatch), Docker

Frontend (Web): React.js, Redux Toolkit, TypeScript, Responsive Design, SPA architecture

Databases: PostgreSQL (Advanced), MySQL, MongoDB, Firebase, Redis, Query Optimization, ORM

CI/CD & Practices: GitHub Actions, Git/GitHub, Code Reviews, Mentoring, Agile/Scrum, Cross-Functional Collaboration

System Design: RESTful API Design, SOLID Principles, OOP, Design Patterns, Data Structures & Algorithms (300+ LeetCode)

Professional Experience

Software Engineer, Full Stack & IoT Systems

Apr 2026 – Aug 2026

GameChange Energy

Remote

- Designed and shipped a **token-based authentication layer** and remediated exposed-port vulnerabilities across services (PostgreSQL, Redis, OPC UA), closing multiple previously unauthenticated device-command paths — direct experience in API access control comparable to rate-limiting/abuse-prevention systems
- Owned end-to-end delivery of **React + TypeScript** frontend features for a solar-site visualization and device-command platform, including real-time master/node hardware control interfaces
- Traced and debugged the full command-execution pipeline (Docker → AWS Lambda → MQTT → IoT devices) in an **event-driven, distributed system**, applying system-design reasoning to production issues
- Extended REST APIs with Django REST Framework and Celery for scheduled and asynchronous device commands
- Refactored core modules using SOLID principles and core **data structures** — **linked lists, stacks, queues, DAGs, and tries** — to improve maintainability of the device-command subsystem

Full Stack Software Developer

Dec 2023 – Mar 2026

Progfin Pvt Ltd (FinTech)

Delhi, India

- Built and maintained **Flutter** mobile modules for the company's production financial app — including user-facing dashboards and onboarding screens, **authentication/security features**, integration with backend REST APIs, and **Firebase-based push notifications**
- Architected and delivered a financial platform in a **regulated fintech environment**, serving 1,000+ SMEs and 10,000+ daily active users, processing 150+ Cr in monthly transactions at 99.5% uptime, using React (TypeScript), Django/FastAPI, PostgreSQL, and AWS
- Designed and owned 10+ RESTful microservices (Django REST Framework, FastAPI) with Pydantic validation, **JWT authentication, role-based authorization**, and Swagger/OpenAPI documentation — the same APIs consumed by the Flutter mobile client
- Led code reviews and mentored 2 junior developers on backend, React, and mobile best practices, collaborating cross-functionally with PMs, designers, and QA across the full SDLC
- Designed a credit-scoring rule engine and automated lending workflows with async processing via Celery
- Improved Django ORM query performance by 70% and cut complex SQL response times from 800ms to 200ms (75% improvement) through indexing and query optimization

Subject Matter Expert, Educational Technology Platform

Apr 2020 – Nov 2021

ByteDance Pvt Ltd

India

- Built Django REST Framework APIs for a grades 9–12 content management platform, contributing to 2M+ video views and 30% enrollment growth
- Implemented RESTful endpoints for enrollment, progress tracking, and assessments; reduced support tickets by 40% via improved validation and error handling
- Analyzed 2M+ user interactions with Python (Pandas, NumPy); built automation scripts that cut manual reporting work by 60%

Key Projects

Flutter Mobile Module (Proffin, Production) | Flutter, Dart, Firebase, Django REST Framework

- Built and shipped mobile screens, auth/security flows, and Firebase push notifications for the company's Flutter-based mobile app, integrated with the existing Django REST backend

Solar Device-Command Platform (GameChange Energy) | React, TypeScript, Node/Lambda, Celery, MQTT, OPC UA

- Enabled remote visualization and control of geographically dispersed solar-site hardware via a Docker → Lambda → MQTT pipeline; hardened endpoints against exposed-port vulnerabilities

Enterprise Financial Platform (Proffin, Production) | Django REST Framework, FastAPI, React (TypeScript), PostgreSQL, AWS

- Full-stack financial application processing 150+ Cr in monthly transactions across 25+ institutions; credit-scoring microservices achieving 85% automation

DevFrnds – Developer Networking Platform | React.js (TypeScript), Node.js, MongoDB | devfrnds.online

- Full-stack platform serving 500+ active users with swipe-based matching, real-time WebSocket chat, JWT auth, and RESTful APIs

Education

Bachelor of Technology (B.Tech), Civil Engineering

Aug 2014 – June 2018

G L Bajaj Institute of Technology & Management, India

- Relevant Coursework: Data Structures & Algorithms, OOP, Database Management Systems, Software Engineering, Computer Networks

Certifications & Additional

Certifications: React – The Complete Guide (TypeScript), Advanced React Patterns, Redux Toolkit, PostgreSQL Performance Tuning, Advanced SQL for Developers

Problem Solving: LeetCode — 300+ problems solved (Data Structures & Algorithms)
